

# User-centric Questions & Meaningful Choices

Questions and Provocations

# W3C Context

- Technical Working Groups: spec and API design
  - WebAppSec WG
  - Devices and Sensors WG
  - Web Performance WG
  - Immersive Web WG
  - ...
- Horizontal Review: security, privacy, accessibility, internationalization, device independence
  - Privacy IG (PING)
  - Accessible Platform Architectures (APA) WG
- Experimentation, pre-Standardization
  - Private Advertising Technology CG

# Open questions and avenues for technical, academic, or W3C work: How might we

- assess user understanding of mechanisms designed to capture user choice?
- minimize the “privacy labor” we ask of users?
- indicate the source and context of a request?
- assure that we account for those at the margins as well as the norm?
- balance innovation and standardization of permissions?

# Use cases

- As a web developer, I want to...
- As a browser developer, I want to...
- As an academic researcher, I want to...
- As a user, I want to...
